

ASSEMBLY INSTRUCTIONS

LAUREL TABLES (SIDE AND COFFEE) BY LUCA NICETTO

These instructions apply to both Laurel side tables and Laurel coffee tables, though the drawings show Laurel side tables only.

PARTS

1x cone with metal threaded rod attached

1x cylindrical base

HARDWARE

1x M14 nut

1x washer

YOU WILL NEED

M14 socket with a ratchet

The help of a friend

NOTES

NOTE 1: Be certain that all assembly is carried out on a flat and stable surface. This will ensure a good final result. Reverse the steps to disassemble the piece.

NOTE 2: Your furniture arrives packed in numerous layers that protect it during transport. It is important that you remove the packaging carefully to avoid damaging your furniture. Refer to our information sheet "Unpacking Your Furniture" for further details.

NOTE 3: Great care is required when assembling our products. Use blankets to soften the assembly surface - hard surfaces such as wood or stone flooring may damage the furniture if in direct contact.

NOTE 4: We advise that assembly and disassembly of De La Espada furniture is undertaken by a minimum of 2 people.

NOTE 5: When screwing in bolts, tighten well, but be sure NOT TO OVERTIGHTEN. This can cause the thread to strip thus resulting in A poor connection.

NOTE 6: While you work, be sure all connections are flush with no gaps.

ASSEMBLY INSTRUCTIONS CONTINUED
LAUREL TABLES (SIDE AND COFFEE)

1) CONNECT CONE AND CYLINDER

a) **SIDE TABLE:** Place the cylindrical base on its side onto a softened raised surface, such as a table. It should be near the edge of the raised surface so the cone will overhang the raised surface when attached.

COFFEE TABLE:

Place the cylindrical base in its natural upright position onto a softened raised surface, such as a table. Note the placement of the hole in the base, and position it so it overhangs the edge of the raised surface.

b) Person number one should support the cylindrical base, holding it safely in place, while person number two supports the cone and guides the threaded rod through the cylindrical base. Again, for the side table, be sure that the cone is overhanging the raised surface, and for the coffee table, ensure the hole in the base is overhanging the raised surface.

c) While person number two holds the cone in place, person number one should secure the cone with the hardware: On the underside of the cylinder, place the washer followed by the M14 nut onto the end of the metal threaded rod. Tighten firmly with a ratchet and M14 socket.
