

ASSEMBLY INSTRUCTIONS

391 HEPBURN MODULAR SOFA BY MATTHEW HILTON

PARTS

HARDWARE

(4x) M8x60 bolts per module

(4x) M8x15 bolts per connect-
ing plate (if relevant)

YOU WILL NEED

6mm heavy duty Allen Key
The help of a friend

NOTES

NOTE 1: The assembly process is different for a sofa that rests on one leg frame, from a sofa that requires more than one leg frame (such as a corner unit or extra long sofa). Pages 2 and 3 refer to the assembly of a sofa with one leg frame, and pages 4 through 6 refer to the assembly of a sofa with multiple leg frames. Please turn to the correct pages for the unit ordered.

NOTE 2: Be certain that all assembly is carried out on a flat and stable surface. This will ensure a good final result. Reverse the steps to disassemble the piece.

NOTE 3: Your furniture arrives packed in numerous layers that protect it during transport. It is important that you remove the packaging carefully to avoid damaging your furniture. Refer to our information sheet "Unpacking Your Furniture" for further details.

NOTE 4: Great care is required when assembling our products as they can mark very easily if banged or dropped. Use blankets to soften the assembly surface - hard surfaces such as wood or stone flooring may damage the furniture if in direct contact.

NOTE 5: We advise that assembly and disassembly of De La Espada furniture is undertaken by a minimum of 2 people.

NOTE 6: When screwing in bolts, tighten well, but be sure NOT TO OVERTIGHTEN. This can cause the thread to strip thus resulting in a poor connection.

INSTRUCTIONS

IMPORTANT NOTE: The following instructions are for a sofa with one leg frame only. To assemble a sofa with multiple leg frames, such as corner unit or extra long sofa, turn to page 4.

1) PLACE THE MODULES IN THE CORRECT ORDER

a) Unpack components and lay them out so they are in the correct orientation according to your chosen configuration. Seat modules have a curved edge and a flat edge. The curved edge will face outward. Place all seat modules upside down.

b) Place leg base(s) across the modules. Ensure that one end of leg base is positioned next to the furthestmost seam.

2) ATTACH MODULES WITH HARDWARE

a) The seat base has nuts nestled into holes across the central axis. Attach the leg base by slotting all bolts through the holes in leg base and into the nuts in the seat modules. Tighten the bolts slightly, but not completely. Firmly tighten just ONE bolt nearest to the end of the leg base.

b) Flip the sofa on its side with the completely tightened bolt positioned nearest to the floor. This will allow the other modules to slide down slightly into the correct position.

c) Check that all modules are aligned, then tighten the remaining bolts completely. This tightening should be repeated several times to ensure the bolts are firmly in place.

3) PREPARE SOFA FOR USE

a) Flip the sofa so it rests in its natural position. This should be done by a minimum of two people.

b) Place the cushions on the sofa.

c) Assembly is now complete and the sofa is ready for use.

ASSEMBLY INSTRUCTIONS CONTINUED

391 HEPBURN MODULAR SOFA BY MATTHEW HILTON

IMPORTANT NOTE: The following instructions are for a sofa with multiple leg frames, such as corner unit or extra long sofa. To assemble a sofa with one leg frame only, turn to page 2.

1) CONNECT LEGS TO MODULES

a) Unpack components and lay them out so they are in the correct orientation according to your chosen configuration. Seat modules have a curved edge and a flat edge. The curved edge will face outward. Place all seat modules upside down.

b) Place leg base(s) across the modules. Ensure that one end of leg base is positioned next to the furthestmost seam. Determine where the sofas will connect, and keep the connection area free by leaving off the last module of each sofa structure.

c) Insert M8x60 bolts into the connection points and tighten firmly.

2) FLIP SOFA COMPONENTS

a) With the help of a partner, flip each partially-assembled sofa into its natural upright position

3) ATTACH CONNECTING PLATE

NOTE: The connecting plate has six holes, but you will only use four, as detailed below.

a1) If connecting a corner unit, use the furthestmost sets of holes. Align the holes in the connecting plate with the relevant holes in the leg frame. Insert a conical M8x15 bolt into each of the four holes and tighten firmly.

a2) If connecting for a straight sofa, use the nearest sets of holes. Align the holes in the connecting plate with the relevant holes in the leg frame. Insert a conical M8x15 bolt into each of the four holes and tighten firmly.

4) ATTACH REMAINING MODULES

a) Place one of the remaining modules onto the leg frame, and align it with the existing module. From below, ensure the holes in the leg frame are aligned with the legs in the sofa body, then insert an M8x60 bolt into each hole, and tighten firmly.

b) Repeat the above procedure for the remaining module(s).

c) Place the cushions on the sofa.

c) Assembly is now complete and the sofa is ready for use.
